No. 19

Cheerfulness a Great Asset

THE great English author, Thomas Carlyle, says: "Give us, O give us the man who sings at his work. He will do more, he will do it better."

No man can work to good advantage with aching feet. The man who would be cheerful and achieve something worth while, should seek the comfort and satisfaction always found in "INVICTUS" footwear.

To produce the "INVICTUS" no detail of manufacture is considered too small for the most careful attention. That is why you will find every model of "The Best Good Shoe" bearing distinctive marks of style and quality.

AROUND THE TOWN

Mrs. C. Hiebert and Mrs. E. Perschabacker were visitors at Calgary on Tuesday.

A. J. Mckenzie of Munson was visiting friends in town for a few days this week.

Mr. Hugh Kennedy of Calgary was visiting Mr. R. A. McPherson on Saturday last.

A. G. Studer is attending the Masonic Grand Lodge meeting being held at Banff.

The Bible Society meets in the Baptist church on Thursday evening.

H. U. Brake of Fort William has arrived here and will act as accountant in the local branch of the Traders bank.

J. B. Szemith conducted the auction sale of town lots in the new townsite of Furber at Innisfail on Monday.

Mr. and Mrs. N. Weicker left on Tuesday for a two months visit to friends and relatives in Ontario and Michigan.

A prominent gentleman in town is determined to give a good report to the census takers when they come around. He was presented with twins on Saturday last.

Miss Geddes, of Belfast, Ireland, paid a short visit to her brother, Mr. Walter Geddes, on Tuesday. Miss Geddes was on her way through to Vancouver.

There will be services at the Church of England next Sunday morning at 11 o'clock for the celebration of Holy Communion. The evening service will be held at the usual time.

W. G. Liesemer has been doing a great trade in gasoline tractors this season, he has sold no less than seven outfits, the last one going to C. D. Carver.

It is hoped that merchants and business men of Didsbury will make preparations for decorating on a large scale for Coronation Day, June 22nd, when Didsbury will celebrate by holding a grand sports day. See about your flags and bunting at once.

Mr. Smith, the old man who was taken to the home for incurables at Medicine Hat two weeks ago and who lived out near Bergen, is dead. A telegram was received stating that death took place on Sunday. The body is being shipped back to Didsbury where he will be buried.

Rev. D. H. Marshall of Knox Presbyterian church, left on Tuesday to attend the General Assembly of the Presbyterian church at Ottawa, as commissioner from the Calgary Presbytery. He intends visiting friends while in the east and will be away for two or three months. Dr. McRae principal of Western Canada College, Calgary, will preach on Sunday, June 4th. Service at 7.00. Further announcements regarding services will be made later.

Masonic Notice

All masons are requested to meet at the Lodge rooms on Sunday afternoon at 2.30 sharp for the purpose of attending the funeral of Bro. Smith of Saranac Lodge, Mich.

J. E. STAUFFER, Sec.

Seeding is Done

Painting, fencing and repairing will now be the order of the day since seeding is done, and we would like to draw your attention to the exceptional values we are offering in

Paints, Barbed and Spring Coil Wire, Hog Fence, and last, but not least, Cyclone Lawn Fence,

which makes a neater appearance around your lawn than any picket fence could make, and it will be in good order as long as your posts last.

We also carry a full stock of LUMBER, and will be pleased to figure on your estimate.

C. HIEBERT & CO.
HARDWARE & LUMBER

The Buckley Guarantee ensures Satisfaction—or a new hat free.

A hat needs a guarantee. More easily than any other article of apparel, a hat can deceive its purchaser—look right without being right. Clothes, or shoes, or ties, you can "size up"—a hat, you can not.

For instance, almost everyone knows enough about tweeds to tell whether a suit will wear well.

With hats, on the other hand, the man who can tell whether it will wear through, stretch, or "looseen" is scarce.

Few can tell a hat's real worth without knowing what goes into its making. None can tell exactly but the manufacturer. He knows better than anyone how long his product will wear—and, if he believes in his hats he ought to be willing to guarantee them.

Buckley Hats are guaranteed. The men that make them believe they'll wear longer than any other hat that's made—and in proof of that belief the makers attach their guarantee for four months. If you buy a Buckley hat to-day, and, any time within the four months, the hat wears out, or the band breaks, or the crown cracks, or the lining comes off, or the hat is in any way damaged, the makers will replace it with a new one of equal value.

Plain made, and of the best quality, is a good hat in a wide range of styles in men's, women's and children's hats. The price is low.

The Raising of the Political Standard

(Contributed by W. G.)

In politics as in everything else there is progression, although it is true that at times things are said and done by political parties which suggest the very antithesis—retrogression.

One of the intellectual constellations of the nineteenth century,—Tennyson—himself a firm believer in the same doctrine that the world is evolving from the lower to the higher, very aptly wrote that mankind through evolution "was ever climbing after some ideal good." It was the same poetical genius who also wrote:

"Yet I doubt not through the ages one increasing purpose runs,
And the minds of men are widened with the process of the suns."

Accepting the truth of such state-ments without question, we can safely say that politics—with some reservations—stand on a higher plane today than at any previous period in history. Men like Gladstone, Bright, Disraeli, Bismarck, Lincoln, Garfield, McKinley, and other statesmen of enviable repute have not served their day and generation without leaving behind them indelible imprints upon the brow of politics.

There is a good deal in the true saying "What we have been makes us what we are." The political world of today is what the past has made it; the future will depend upon the building of the present. Not in vain are the splendid efforts of Lloyd-George on behalf of the working man in Great Britain being made, nor yet the noble endeavours of Sir Edward Grey and Wm. H. Taft in the cause of world wide peace and amity. On the contrary, these are solid links in the massive chain of national and international development.

One of the lamentable features of public life, whether it be in Municipal, Provincial or Federal affairs, is the way in which many of our best citizens shrink from identifying themselves actively with politics. It is to be deplored that in some of its phases, an undesirable stigma—perhaps rightly, perhaps wrongly—attaches to the politics of today. In any case, the political world in all its branches has ample room for men of strong caliber, intellectually and morally. Never was adage more fitting given "righteousness exalteth a people." Political life demands the best, and it is nothing short of a calamity when those who are best fitted to serve their town, province, or country, hold themselves aloof.

During the past year, New Jersey furnished a splendid example of what can be done by an alliance of integrity and culture with practical statesman-ship, when she singled out for Governor from the scholastic precincts of Princeton University, no less a person-ality than its gifted principal—Prof-essor or Woodrow Wilson. That the political standard of New Jersey has attained an eminence hitherto unknown is no longer a matter of speculation, and it is any wonder that the people place implicit confidence in their new Governor, es-pecially when one takes into account that already all his campaign pledges have been enacted into law. This with-in so short a period constitutes an achievement almost without parallel. "The old order changeth, giving place to new." What has been done in New Jersey can be accomplished every-where, for to come to the foundation of things, it is the people who are respon-sible for those who represent them.

The day is beginning to dawn when partisanship in politics shall be subor-dinated to principle. Not so much party as principle will ultimately be-come the determining factor in Muni-cipal, Provincial, and Federal affairs. Then and only then can we look for-ward with confidence to the further raising of the political standard.

For Sale

Wagon, all iron, double box, nearly new; set double heavy harness; 10 1/2 acres of land and 4 lots. The land is straight east of the lots and the lots are straight south of Mr. Beane's house. There is a granary on the lots 12 by 14, two hen house and a stable. Will sell cheap, cash or on time, 7 per cent. interest on time. Apply John Cook at Charlie Hugst's house.

FILLING UP THE WEST

TWO MILLION IMMIGRANTS DURING PAST TEN YEARS

The Immigration Bulletin just issued gives actual figures of the gain to the Dominion through immigration—More Than One-third Came from Great Britain and About as Many from the States.

Ottawa.—During the past ten years Canada has received nearly two million immigrants of whom approximately 750,000 were from Great Britain, and 700,000 were from the United States. The immigration bulletin just issued gives the actual figures up to the end of the fiscal year, March 31, as 1,714,326 for the decade. Since then nearly 200,000 more have arrived, divided about equally between British and American.

According to occupation, about 65 per cent. of the immigrants arriving from the United States are farmers or farm laborers who for the most part have settled in the prairie provinces. Thirty-eight per cent. of the total number from across the line made up of homesteaders, 600,000 in all. About thirty per cent. of the British and continental arrivals were farmers or farm laborers while 60 per cent. were classed as general laborers, and nearly the same percentage were classed as mechanics.

Negroes has totalled only a little over four hundred, while 5,200 Hindus have come. Of the British immigrants, approximately 600,000 have been English and Welsh, 150,000 have been Scotch, and about 45,000 are Irish. The figures for the continent are as follows:

Austria Hungarians, 121,000; Italy, 83,447; Belgium, 60,000; Russia, 38,550; Sweden, 19,549; Germans, 21,145; French, 16,250; Norwegian, 13,792; Syrians, 5,200.

The distribution of the immigrants by provinces gives a good idea of their respective numbers arriving. Saskatchewan and Alberta got a little over half a million immigrants during the decade, Ontario 350,000, with 405,800; Manitoba got 369,621; Quebec, 258,520; British Columbia and the Yukon, 185,669; and the Maritime provinces only 73,502.

Western Canada therefore got some 300,000 more new settlers than eastern Canada.

THE "FAVORED NATIONS."

The Population and Area of These Countries

The twelve favored nations with which we have been negotiating have been written in connection with Reciprocity, are given below with their respective areas and populations. These so-called "most favored nations" are entitled to the same tariff advantages as the United States, and for any Reciprocal trade agreement that may be adopted by Canada.

Area in square miles.	Population.
Argentina . . .	1,117,695 6,210,428
Aust-Hungary . . .	241,197 20,980,000
Bolivia . . .	364,751 1,492,000
Denmark . . .	15,052 2,492,000
Japan . . .	147,476 40,753,000
Norway . . .	124,098 2,500,000
Russia . . .	8,570,644 152,000,000
Spain . . .	194,744 19,794,000
Sweden . . .	142,000 4,000,000
Switzerland . . .	15,417 3,550,000
Venezuela . . .	360,358 2,647,000
Bolivia . . .	350,000 sq. 2,400,000
	12,161,085 299,705,428

Delay in Vote of Reciprocity Bill

Washington.—The Senate has fixed June 12th for a vote on the joint resolution providing for the ratification of United States senators by direct vote of the people. Resolution already has passed the House. Senator Stone expressed the fear that the Senate's action would block consideration of the reciprocity or any other bill which might be reported from committee before June 12, and while he did not object to the final adoption of the motion he declared he withheld his objection reluctantly.

Western Crop Will Be 200,000,000 Bus.

Toronto.—That the western Canadian crop will be 200,000,000 bushels, that the increase in crop area this spring is 25 per cent, chiefly in Saskatchewan, and that the area under crop is as follows:

Saskatchewan, 6,000,000 acres; Alberta, 500,000 to 1,000,000 acres; Manitoba, 3,000,000 acres.

These are the statements of Wm. Whyte, of the C. P. R., who is in the city from Winnipeg on his way to Montreal.

Hopes to Start Construction This Year

Ottawa.—The department of railroads and canals, it is announced, issued a call for tenders for the construction of the first 160 miles of the Hudson Bay railway, starting at the P. S. Mission. The contractors will be given two months to submit their proposals to the government, and it is hoped that the contract will be awarded in time to permit a start being made on construction work this summer.

Won't Release Imprisoned Bankers

Washington.—President Taft has denied applications for the pardon of Charles W. Morse, of New York, and John R. Walsh, of Chicago, the most prominent bankers ever convicted and sentenced to prison under the national banking laws.

EAGLE CHALLENGED AVIATOR

Monster Bird Attacked One of the Contestants in the Big Race in Spain

San Sebastian, Spain.—Attacked by a giant eagle while sailing along on the last leg of his flight from Madrid to Barcelona, the bird, a Spanish acrobatic, Mr. Gilbert, was in grave danger for several minutes. The bird swooped down upon the aviator, apparently believing that the bright monoplane was some fantastic demon.

It landed on the front of the monoplane, and after reconnoitering for several seconds finally lunged directly at Gilbert's head. As its claws struck the metal head piece which he was wearing, the bird flung upward and then swooped down again. This time it missed the aviator and the crowd cheered the propeller by a few inches. The swish of the air currents stirred up by the wind from the propeller blades further enraged the bird and with a shrill scream it pursued the monoplane, and made another swoop at Gilbert, trying to strike his eyes with its sharp claws.

Realizing his peril, Gilbert got out his revolver. His first shot went wild, but the second entered the body of the bird and it fell earthward. Gilbert lost control of his monoplane for a moment, but regained it in time to clear the field of the air currents stirred up by the bird and it fell earthward. Gilbert lost control of his monoplane for a moment, but regained it in time to clear the field of the air currents stirred up by the bird and it fell earthward.

DIAZ QUIETLY STEALS AWAY

President for Thirty Years—Few See Him Depart—Leaves for Spain

Mexico City.—Porfirio Diaz, for whom during 30 years all Mexico has been one side land, has slipped from the capital with great secrecy at 2 o'clock in the morning. Only a few devoted friends whom he trusted to follow him to the station. He was bound for Vera Cruz to take the steamer for Spain.

His departure, Francisco I. Madero Jr. in a manifesto to the people of Mexico resigned the position of provisional president conferred upon him by convention of the revolutionists at the city of San Luis Potosi last October and called upon all Mexicans to support Senor De La Barra, as the sole executive of Mexico.

His departure, Francisco I. Madero Jr. in a manifesto to the people of Mexico resigned the position of provisional president conferred upon him by convention of the revolutionists at the city of San Luis Potosi last October and called upon all Mexicans to support Senor De La Barra, as the sole executive of Mexico.

Dominions Were Not Consulted

London.—The Standard says the dominions, whose existence depends upon the supremacy of British sea power, were not consulted in the declaration of London at the convention, which declaration commits the final jurisdiction of war to a court of appeal. Australia and Canada, which are founding navies, and New Zealand, which is giving a battleship to the royal navy, are expected to acquiesce the arrangement, but the dominions are giving a veto to Australia, who put down the resolution disapproving the declaration of London, which was discussed at the conference, was persuaded by the ministers present to modify his views before discussion.

Contented Canada Flying Union Jack

Edinburgh, Scotland.—Lord and Lady Macdonald, who were received from President Taft on the flight of Anglo-American arbitration which was delivered to the British Assembly of the Church of Scotland here recently by Dr. J. A. Macdonald, President of the assembly, and once voiced his well known enthusiasm in favor of a practically unanimous treaty and declaration of the assembly that it is my one desire that Canada shall continue to prosper, being the British flag and sharing with the United States the responsibility for North American civilization.

A motion hailing with satisfaction the treaty between the United States and Great Britain was adopted with acclamation.

Domestic Scarcity in the West

Ottawa.—The problem of supplying domestic to farmers in the west is assuming serious proportions, was the statement made by Hon. W. R. Motherwell, Saskatchewan minister of agriculture, who was in the city recently.

"Labor of all kinds, both domestic and foreign, is scarce in the west, but the land men do not seem to be linked together by wireless, and plans to this end are now being made. The government is now making plans to this end are now being made. The government is now making plans to this end are now being made.

U. S. Establishing an Aerial Navy

Washington.—The foundation of Uncle Sam's aerial navy was laid recently when Assistant Secretary of the Naval Academy by July 1st, next, of three aeroplanes. The navy will be the very latest development in aeronautics, being capable of rising from the water and alighting on the land and men do not seem to be linked together by wireless, and plans to this end are now being made. The government is now making plans to this end are now being made.

TAKING THE CENSUS

ARMY OF ENUMERATORS WILL COMMENCE WORK JUNE 1

It is Confidently Predicted That the Count Will Give the Dominion of Canada a Population of Eight Millions—Believed that there are Three-Quarters of a Million People in the West

Ottawa.—Early Thursday morning the count of heads will begin all over Canada. Every man, woman and child living in Canada at midnight on the first of June will be counted if two or three hundred enumerators and their armies of enumerators do what is required of them.

Some will inevitably be missed but the count will be good enough to give the Dominion of Canada a population of eight millions or thereabouts and to give three-quarters of a million people in the West. The count begins on Thursday and the province of Quebec is making confidential predictions, and the province of Quebec has a way of bobbing up after each decennial count with a most surprising total. If the Quebec increase is as great as Quebec people say, it will mean that the proportion of the Dominion population will be larger and the West will get less than it is expected.

Census takers will follow what is known as the Dejure system of enumeration. The census takers will follow what is known as the Dejure system of enumeration. The census takers will follow what is known as the Dejure system of enumeration.

TATF'S CONCLUSION

Farmers Shall Sell More to Canada Than They Will Buy

The National Grange, the representative body of the United States farmers, has been exerting its influence at Washington against the passing of the Reciprocity agreement with Canada. President Taft met with the Grange at Washington just recently and spoke in part to them as follows:

"I believe this treaty to be the best thing for the whole country, including farmers, and I believe it is flying in the face of Providence to put an artificial wall like that between this country and Canada and not get the benefit that will accrue to peoples of the same trade. I believe it is flying in the face of Providence to put an artificial wall like that between this country and Canada and not get the benefit that will accrue to peoples of the same trade.

More Negroes Coming to Alberta

Regina.—It is understood in this city that the Haslam Land and Investment company are going extensively into the business of locating settlers in the Edmonton land district and in the territory adjacent to Edmonton. The company is now arranging to bring in a large party of negroes from the United States to settle on the land.

Wireless Will Girdle the World

Gloucester, N. S.—Communication by wireless from Gloucester, N. S., to Dakar on the coast of French West Africa, is the astonishing feat that has just been accomplished by the Gloucester wireless station. The message was sent in this place to Eiffel Tower at Paris and from Paris relayed to the Dakar station, which is about 1,800 miles distant. So successful was the experiment that it is now announced that the transatlantic cable will be linked together by wireless, and plans to this end are now being made.

Free Trade Must Be Maintained

London.—Premier Asquith in an address to the Liberal Colonial Club, reaffirmed his adherence to the cause of free trade. He declared that to secure prosperity to the mother country and the colonies it was necessary that they maintain the fiscal system that their forefathers had established. He declared that to secure prosperity to the mother country and the colonies it was necessary that they maintain the fiscal system that their forefathers had established.

Will Link Great Lakes to Britain

Manchester.—The Guardian says: "We understand from Lord Furness that the transatlantic cable will be linked together by wireless, and plans to this end are now being made. The government is now making plans to this end are now being made.

LOW PRICES IN THE STORES

Markets for Farm Produce on the Down Grade

There has been a decided recession in the various markets for consumable commodities in the United States since the first of May, when the great body of consumers in different parts of the republic protested against the high cost of living in the form of anti-meeting leagues and by many petitions to the government at Washington. The Pioneer Press, of St. Paul, Minnesota, recently published the following table which shows prices of various commodities in April, 1910, and April, 1911:

Commeal, per bush.	2.10	1.50
Lard, per lb.	.18	.12 1/2
Cheese, per lb.	.17 1/2	.13
Bellied pork, per lb.	.25	.19
Ham (whole), per lb.	.16 1/2	.12 1/2
Beacon, per lb.	.18 1/2	.14
Pork, per lb.	.16	.12
Eggs, per doz.	.25	.16 1/2
Butter (best grade),	.35	.28
High grade, per lb.	.34	.28
Strain steak, per lb.	.22	.20
Porterhouse, per lb.	.22	.20

The above statement combined with the recent dropping of the Patrick Cudahy, foremost of United States packers, that recent hogs would be sold at a price which would be equivalent to point quite plainly to an era of low prices across the line for every article of food. The situation is equivalent with the United States according to these facts would only let the price of food fall into a country where trade is demoralized and markets are falling.

DR. RUTHERFORD QUILTS OFFICE

Will Leave Ottawa to Reside in British Columbia—His Health Has

Ottawa.—Dr. J. G. Rutherford, Dominion Live Stock Commissioner and Veterinary Director, General of Canada, has tendered his resignation of the Dominion government, has tendered his resignation to the minister of agriculture and intends to go to British Columbia to reside. His resignation has not yet been accepted.

The resignation of Dr. Rutherford is one of the best known veterinarians of the continent and he has been the best during the last years of his life. He is one of the best known veterinarians of the continent and he has been the best during the last years of his life. He is one of the best known veterinarians of the continent and he has been the best during the last years of his life.

Winnipeg to Edmonton Waterways

Ottawa.—Work of surveying the route of the proposed waterway from Winnipeg to Edmonton is being pushed this year under the direction of Mr. Velguy, one of the engineers in charge of the works. It is expected that by directing particular attention to the problem of reservoirs and storage, the work of costly dredging will be avoided. The waterway when completed will be a great boon to the commerce of Winnipeg to Clear Lake and sixfold from that point to Edmonton. It is expected that the work will be commenced shortly after the surveys are completed. As compared with other Canadian waterways, the proposed waterway will not be heavy as there are long stretches of navigable water.

England's Population 36 Millions

London.—The provisional returns from the census of the population of England and Wales this year as 36,075,200, as compared with 32,727,000 in 1901. The increase in population is very marked, there are many causes, particularly in Wales, where there has been a large increase. The population has increased to 7,252,900 in 1901, and to 3,827,300 in 1906. The increase in population is very marked, there are many causes, particularly in Wales, where there has been a large increase.

Belgian Horse Ranch Sold

Calgary.—What is generally admitted to be one of the finest ranches in Alberta, the Belgian Horse Ranch, has been sold to a party of investors. The ranch is situated on the banks of the Elbow river, and contains in all 2,400 acres of land, and is one of the finest horse ranches in the world. The ranch has been sold to a party of investors, and the sale was a success.

Servant Girls for Canada

Winnipeg.—A woman who has returned here from Great Britain, where she has been on her semi-annual tour for servant girls. She says the class of girls who are never better than many of them having friends in Western Canada, from whom they receive encouraging reports.

Honors for the King

Berlin.—Max, announced that Emperor William while at Buckingham Palace on May 16, had appointed King George as General Field-Marshal of the Prussian army.

THE SUNDAY SCHOOL

LESSON X.—SECOND QUARTER, FOR JUNE 4, 1911.

Text of the Lesson, John xiv, 15-27. Memory Verse, 25-27—Golden Text, John xiv, 16—Commentary Prepared by Rev. D. M. Stearns.

As Israel's penitence and God's pardon, according to Hos. xiv, the regular lesson for the day, can only be by the Holy Spirit, we will consider briefly that lesson, but give most of the time to the gospel lesson. It is as they shall look upon Him whom they have pierced, when they shall see Him coming in glory, that the Lord will pour upon the house of David and the inhabitants of Jerusalem the Spirit of grace and of supplication, and there shall be a multitude mourning and a people that shall be comforted. Then shall all flesh (Jeh. ii, 28).

It is only by the same Holy Spirit that after that day will ever get to know the meaning of sin and righteousness and judgment by knowing the Father and the Son. And by seeing in His sufferings how hateful sin is to God, Jesus Christ came into the world to save sinners, Paul saw himself to be the chief of sinners, and came into a country was such a great Saviour that he could think or talk of no one else. It will be just so with his people Israel, and with us, who will ever get to know the meaning of sin and righteousness and judgment by knowing the Father and the Son.

In the present day, we know the meaning of sin and righteousness and judgment by knowing the Father and the Son. And by seeing in His sufferings how hateful sin is to God, Jesus Christ came into the world to save sinners, Paul saw himself to be the chief of sinners, and came into a country was such a great Saviour that he could think or talk of no one else. It will be just so with his people Israel, and with us, who will ever get to know the meaning of sin and righteousness and judgment by knowing the Father and the Son.

So we have a comforter in the present day, we know the meaning of sin and righteousness and judgment by knowing the Father and the Son. And by seeing in His sufferings how hateful sin is to God, Jesus Christ came into the world to save sinners, Paul saw himself to be the chief of sinners, and came into a country was such a great Saviour that he could think or talk of no one else. It will be just so with his people Israel, and with us, who will ever get to know the meaning of sin and righteousness and judgment by knowing the Father and the Son.

We must not only read His word and memorize it, having it up in our hearts, we must use it, appropriately, it makes it very own, according to Jer. xv, 16; John, xiv, 12; Eek. 14; Rev. 18:1. This only can we do, and that is, we must have it in our hearts by faith. "The life of Jesus made manifest in our body" (John, xiv, 19). In verse 19 of our lesson He seems to say that He expects that we will have it in our hearts by faith. "The life of Jesus made manifest in our body" (John, xiv, 19).

We must not only read His word and memorize it, having it up in our hearts, we must use it, appropriately, it makes it very own, according to Jer. xv, 16; John, xiv, 12; Eek. 14; Rev. 18:1. This only can we do, and that is, we must have it in our hearts by faith. "The life of Jesus made manifest in our body" (John, xiv, 19). In verse 19 of our lesson He seems to say that He expects that we will have it in our hearts by faith. "The life of Jesus made manifest in our body" (John, xiv, 19).

In verse 19 of our lesson He seems to say that He expects that we will have it in our hearts by faith. "The life of Jesus made manifest in our body" (John, xiv, 19).

Nothing is so unbelievable as Truth. So the man without Faith is always fooled.

CONCRETE THE SALVATION OF THE FARM

It is only a few years since concrete was generally accepted as a reliable building material, yet the difference which this constant and economical form of construction has made in the outlook of the farmer in these few years, has done much to revolutionize things on the farm.

The growing scarcity of lumber and its consequent rise in price, has gradually caused that commodity to assume the general aspect of a luxury. So much lumber is used on the farm for buildings and fences that its extremely high price has made it almost prohibitive to the average farmer unless he has an extra large sum of money to spend on output. Wire fencing partially solved the problem, but real relief did not come until concrete was proven by actual tests to be not only practicable, but to possess many advantages over wood as a building material.

The uses to which concrete can be put are practically without limit, more particularly on the farm. Already the list includes forms of construction ranging from the large hip-roofed barn down to the nest-box that delects the wisest old layer in the brood. These uses have been extended largely by a series of extensive experiments conducted under the auspices of the Canada Cement Company, on farms throughout the country. This large concern, which has fostered the concrete building process in Canada, has been a large factor in the spreading of knowledge of concrete and its uses. Recently it has distributed 65,000 copies of a book entitled "What the Farmer Can Do With Concrete." This work contains information which makes it possible for any farmer to do almost any kind of construction work around a farm with concrete, and is given free of charge. This generous distribution of literature and the efforts of this firm to show the farmer how practical concrete really is, have earned for them the highest of commendations.

The most recent plan to introduce concrete to the farmer is a contest arranged by the Canada Cement Company. The lines along which the contest is planned are broad enough to

enable every farmer to compete with the best chance of success with the most experienced user of concrete. In each Province there are four cash prizes of equal value offered, each prize \$100. The first is to be given to the farmer in each Province who will use the greatest number of barrels of "Canada" cement in a given time on his farm; and the prize will be given to the farmer in each Province who uses "Canada" Cement on his farm in 1911 for the greatest number of purposes; the third is to be given to the farmer in each Province who furnishes a photograph showing the best of any particular kind of work

done on his farm during 1911 with "Canada" Cement. The fourth will be for the farmer in each Province furnishing the most complete description of how any particular piece of work, shown by any photograph set in, was done. This contest will be open until November 15th, 1911.

Already much has been accomplished on the farm by the use of concrete. Perhaps the greatest advantage is in its favor, and one which has developed only since concrete has actually been put into general use, is its health-promoting properties.

If sickness occurs in a city to any great extent, a searching investigation usually follows, conducted by a medical health officer, with the result that it is traced back to its cause and this cause removed.

The farmer must be his own medi-

able to avoid this objectionable condition in a barnyard. Owing to the stamping of cattle and the rooting and scratching of the smaller stock, the ground seems to be kept constantly worked up into its oozy state. Into this, and through it, the farmer is compelled to make his way several times a day while doing his chores. Despite his best efforts, a certain amount remains upon his shoes and clothing. If he escapes the germs that are sure to exist in the stagnant wallow, and does not catch a cold from wetting his feet in it, he always runs the risk of carrying some unsavory particles into the house on his shoes where they dry into fine dust and are stirred up by the next sweeping, filling the atmosphere that has to be breathed.

To avoid this altogether would be impossible, but the farmer has found a way in which much can be done to alleviate the barnyard troubles.

Instead of wading through mud, feeding their hogs in a muddy hole, while he waters the stock, he stands on a concrete platform on which is set a concrete drinking pool. This serves a double purpose of furnishing clean water for the horses and cattle, but also does not harbor the germs of contagion, as does a muddy hole, often lurk in old wooden drinking troughs.

His small stock and poultry, instead of rooting in the mud and filth for their food, take it from a concrete trough set in a convenient spot in the barnyard. This may be swept down or washed off and prevents a waste of feed.

The use of concrete as drainage material and in forming gutters under eaves makes it possible for farmers' wives and daughters to visit the barn without danger of contracting colds and without many other unpleasantnesses.

With water pressure secured from a concrete cistern built above ground and the use of concrete in the building of closets, many of the objectionable

Elkton Pick-ups

Watch Elkton grow.

Here is the man with the sunshine, he seems to be snowed under. Moon and Russell the saw mill men, think it hard lines to be snowed under in May. I guess it is.

Robert Brown is building a real estate office here.

A butcher shop will be opened at the Creamery in the near future.

A big larnance was held at Moon's on May 25th.

Earl Bouckmen was seen out driving last Sunday.

Dan McIntyre has left with a survey party for the Yellowhead Pass.

For soreness of muscles, whether induced by violent exercise or injury, Chamberlain's Liniment is excellent. This liniment is also highly esteemed for the relief it affords in cases of rheumatism. Sold by dealers everywhere.

Melvin Notes

Rev. J. E. Howson is away in Calgary attending the Methodist Conference there. He is expected back towards the end of the week.

Mr. Harold Gilmore visited recently at the home of Mr. Nelson.

Mr. Arthur Shantz spent a couple of days at Mr. Bricker's recently. He has returned from a very enjoyable trip to Vancouver, Seattle, and Prince Rupert, where he spent the greater part of the spring.

Owing to the snow and cold weather Melvins did not celebrate the twenty-fourth very extensively. Storms always seem to have a special liking for Victoria Day.

Mrs. Cox is improving steadily under the care of nurse Pickett of Calgary. We trust that she soon will be as well as ever again.

Mr. Graham, the "old" Harman teacher, is visiting friends in the district. He is now attending Collegiate in Strathcona. We notice the fact he wears a happy smile on his face, and seems anxious to return to the city. Hence, we wonder if certain vague rumors are true.

Miss Julia Meeker visited at Mr. Hugh Gilmore's on Sunday.

Miss Willie and Mr. Harold Gilmore visited for a time at Mr. Meeker's this week.

Miss Hall and Miss Kennedy entertained a few friends on the twenty-fourth of May, and report a good time. They say that in spite of the stormy morning they were able to play a couple of sets of tennis in the afternoon.

The "Hook" of Mr. Warren's auto can be heard quite frequently in the evenings.

The Melvin boys are talking baseball now. We hope they will live up to their usual reputation this summer.

Wedding bells are in the air.

Sick headache results from a disordered condition of the stomach, and is cured by the use of Chamberlain's Stomach and Liver Tablets. Try it. For sale by dealers everywhere.

Neapolis Notes

Miss Edna Lyons visited friends in Didsbury a few days last week.

Guy Oldham has "struck", on hatching.

Bert Scott, of Three Hills, took dinner with J. D. Ward on Wednesday last.

Mrs. P. H. Lantz is still very sick.

Alice Ward has been enjoying a fine collection of measles.

Jessie Bell is out at Trochu this week on business, leaving section 17 in the trust hands of Abie Shelly.

R. C. Oldham spent the week end in Didsbury.

There was a quiet wedding at the Presbyterian manse, Tuesday, May 27 at 7 o'clock when Guy C. Oldham of Neapolis and Miss Ethel Amanda Metcalf of Penhold were united

in marriage by Rev. Marshall. Neapolis friends extend hearty congratulations.

Rev. Mr. Beane is greeted by large congregations every Sunday and is rendering most efficient and acceptable service. His sermons are delivered with the fervor and force of true spiritual passion. And we speak for him many converts during his stay with us.

An ice cream social will be held at the schoolhouse on Wednesday evening, June 7th, at a benefit for Mr. Bates, our one time singing master who has had the misfortune to lose an arm. A good programme will be given and a full house is desired. Everybody should come who possibly can.

When a steady, sensible, ambitious boy develops into a young man who drinks, gambles and loafs, there is something wrong, and not altogether with the young man. Are temperance and morality taught impressively in our public schools, and do you parents keep them before your boys while they are young? Especially do you fathers set your boys a right example along these lines? And you young people, are you exerting your influence for good, on every boy with whom you come in contact, "you are your brother's keeper."

Is there anything in all this world that is of more importance to you than digestion? Food must be eaten to sustain the body, must be digested and converted into blood. When digestion fails the whole body suffers. Chamberlain's Tablets are a rational and reliable cure for indigestion. They induce the flow of bile, purify the blood, strengthen the stomach, and tone up the whole digestive apparatus to a natural and healthy action. For sale by dealers everywhere.

FOR SALE

For Sale—Three good work horses, James from 1,200 to 1,300 lbs. Apply to Hughes Bros, Lone Pine P. O., or Sec. 36, Tp. 31, R. 25.

AUCTION SALE

Having received instructions from

MR. A. F. COVITZ

I will sell by public Auction at

11 miles straight west of Didsbury

on blind line, 1 mile north

of Mr. McIntyre's place

ON

Thursday, June 15

Sale at 1 o'clock sharp. Lunch at noon

HORSES—Black gelding, 12 years old, weight 1300; grey gelding, 12 years old, weight 1300; Sorel mare, 13 years old, weight 1150, sup. in foot; Bat mare, 4 yrs. old weight 1050; Saddle mare, six yrs. old, foal at foot; three yearling colts.

CATTLE—4 head, 10 milk cows, 13 giving milk, balance bred for winter calving; 1 purebred Ayshire bull 2 yrs. old take 2 prize at Calgary stock show 1910; 15 years 1189, 9 steers, 6 heifers, 10 spring calves.

HOGS—27 head, 6 brood sows; 7 spring pigs; 14 shoats from 90 lbs. to 150 lbs.

A quantity of oats and barley chop.

About 75 bush. of May seed wheat.

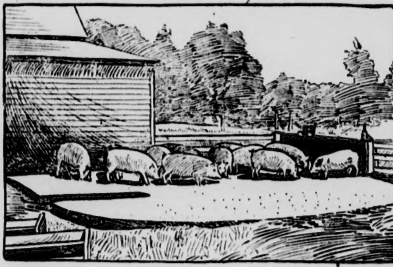

IMPLEMENTS—Cockshut sulky plow, stubble and breaker bottom; 2 John Deere 16 in. brush breakers; 2 front & Wood disks; Adams wagon; 18 in. mowing, nearly new; Big 4 McCormick mower, new; Hay rack and sweep; Sickle grinder; Grind stone; Garden scuffer; Logging chains, 240 lb. Ticks saw; Single top buggy, nearly new; Set buggy harness; 2 set plow harness; Heavy cowboy saddle; Complete blacksmith outfit, consisting of Grand Hay blower or fan, first class machine; post drill round shank, with a complete set of drills; 2 in. jaw, 145 lb. Peter Wright's 4 in. hammer; 2 tons; horse shoeing outfit; tooth rasps and wrenches; chisels; punches.

HOUSEHOLD FURNITURE—Magnet cream separator, capacity 300 lbs. a new machine; 10 gal. barrel churn; 2 to gal. milk cans nearly new; 1 bedstead; 10 gal. octaves; 2 iron bedsteads; Childs wooden bed; table; Washing machine; Sheet iron heater; Favorite crock stove; 16 page Shogun; About 50 full blood, Plymouth Rock chickens, some small chicks, and other articles too numerous to mention.

TERMS—All sums at and under \$10 cash; over that amount 16 months credit on approved joint bankable note at 8 per cent. interest; no interest if paid Oct. 1st, 1911, otherwise notes drawn interest from date of sale. 4 per cent. off for cash.

D. S. SHANTZ G. B. SEXTON

Clerk, Auctioneer

HOGS EATING FROM A CONCRETE FEEDING FLOOR.

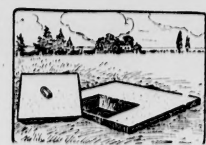

ical health officer. He must look to his own farm. A great deal is now being done along these lines, and in many places, particularly in the West, it has been found that a number of the causes of sickness can be avoided by the use of concrete.

A common sense view of the situation shows that this simply-handled material is peculiarly well adapted to measures of sanitation and in preventing germs from spreading.

Possibly the place visited more often than any other by the farmer is his well. If it is so situated that the unhealthful ground streams can leak into the drinking water, there is every possibility of this unhealthfulness being communicated to the farmer and his family by the most direct route. Concrete has done much to remedy this. If a well is built of concrete—a solid cylinder set into the ground—it is impossible for such leakage to occur. In the same way a concrete drain provides but slim accommodation for disease germs. These two simple precautions are a long stride in the direction of good health, as water and milk, the latter even more than the former, are the commonest of the germ-distributing agencies and both are used frequently by the farmer and his family.

Not only has the modern farmer studied out a method of guarding against sickness from sources which might, in the case of water and milk, be termed, internal. He has gone a step further and has decided that the barnyard must also be subjected to some changes if doctors' pills and doctors' bills are to be dodged.

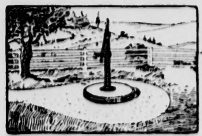

The average barnyard—there are many worse, some better—consists of a patch of hay or straw, a manure pile, a watering trough, and a spout, or a mass of mud, dirt, and filth, in between and all around. Most farmers will recognize the type as being familiar, even those whose farms are models in other respects. Until recently it has seemed almost impos-

SOLID CONCRETE CISTERN.

features are removed and with proper drainage, much can be done to make such buildings perfectly sanitary.

Aside from its advantages as a germ-proof material, concrete finds favor with the farmer today because he can use it himself as easily as he could use wood. All that is required is a quantity of broken stone, sand, and Portland cement. The moulds are easily constructed and can be made of odd pieces of lumber handy. With the exception of the cement, the materials can be found on almost any farm and should cost little or nothing.

GROWING CONCRETE WELL CURB AND PLATFORM.

enable every farmer to compete with the best chance of success with the most experienced user of concrete. In each Province there are four cash prizes of equal value offered, each prize \$100. The first is to be given to the farmer in each Province who will use the greatest number of barrels of "Canada" cement in a given time on his farm; and the prize will be given to the farmer in each Province who uses "Canada" Cement on his farm in 1911 for the greatest number of purposes; the third is to be given to the farmer in each Province who furnishes a photograph showing the best of any particular kind of work

YUKON CLIMATE GENIAL.

Delights of Summer Prevail for Four Months.

No longer is the Klondike, even in popular conception, the lone land of ice and snow, which fletion and tradition pictured. Now, with the sun on the heels of the gold-seeking pioneers have come railroad builders and telegraph linemen, capitalists, bankers, settlers, until not only Alaska but the far northwest is repeating California's marvellous story of development.

Steamers, many of them palatial in fitting, now navigate the rivers; towns with organized systems of government are growing fast, with schools, churches, banks and streets lighted with electricity and paved. From end to end of the mighty river, the Yukon, the traveler may wander during four months of the year and never see snow. Instead there will be a tangle of rich vegetation, of great forests, of grass that grows as high as a man's shoulder, wild berries in great variety, beautiful ferns waving in the soft breeze, and the beds of the purple lupine and the beautiful yellow lilacs bordering the banks everywhere.

Three years ago the inhabitants of Dawson lived principally on dried and canned meats and sliced evaporated potatoes. Today fresh meat is bought in winter and all vegetables are grown nearby.

Nothing pleases the Klondiker more than the south at table with lettuce, asparagus, green peas or celery grown in his own rear yard. Overgrown, throughout the Klondike country live stock can find sufficient food to sustain life even in winter.

From Dawson city to St. Michael's by the Yukon is 1,000 miles, and during the open season of navigation, from the middle of May till October, some 40 steamers ply the river, making the trip in 10 to 12 days.

The Yukon is easy to navigate, being without snags and high banks, the current running at about three miles an hour. Mowing machines and other heavy making tools at frequent sights along the banks all the way to St. Michael's.

The railroads of the Canadian Yukon in the valley of the Peace River are being built primarily because of the enormous wealth of the country, but agriculture and lumber are the great natural resources of the vast stretch of land, which is as yet little known to the world.

Col. Denison Arrested.

Col. George T. Denison, Toronto's famous police magistrate, was once arrested himself under peculiar circumstances. It was in the spring of 1868. He was in Montreal, where he met Sir Henry Havelock, with whom he had become acquainted the year previous in Toronto. Sir Henry, a son of the Havelock of Indian Mutiny fame, had come to Canada to succeed Colonel (afterwards Lord) Wolseley as Deputy Quartermaster-General of the forces here. He found Col. Denison to be a congenial spirit, full of enthusiasm for military affairs, and so he asked him to accompany him on a walking tour through the Eastern Townships, to secretly examine the frontier and verify the official military map. Col. Denison was pleased to go along. But the mysterious movements of the two when they started aroused considerable suspicion. At last, while they were at the village of Huntington, they were questioned by a local militia officer, and as their answers did not satisfy him, the two colonels were arrested. The officer in charge intimated that the village magistrate was ready to commit them as "suspicious characters," and that they were to be driven twenty-eight miles to the county jail at Beaulieu.

At that stage of the proceedings they bound the magistrate to secrecy, disclosed their identity, and were then allowed to proceed. Col. Denison tells the story in his book, "Soldiering in Canada," and notes that this was the only time he was ever placed under arrest.—Toronto Star.

Canadian Artists Honored.

A couple of members of the Canadian Art Club were recently honored in New York. At the annual dinner of the Architectural League of New York, which is holding its yearly exhibition at the present time, the medal of honor for sculpture was presented to Mr. Phinister Proctor, for the statues of tigers which have been presented to Nassau Hall, Princeton University, by the city of 1879. The models for these tigers were exhibited at the Canadian Art Club's exhibition in Toronto last February. The completed works are in bronze and are beyond life size. Another member of the club, Mr. Horatio Walker, was honored by the purchase of his famous picture "Oxen Drinking," for the Canadian National Gallery at Ottawa. The picture has for a considerable period been on exhibition at the Montreal gallery of the same name. Its removal to Ottawa has excited so much interest in New York that in making the announcement, the New York Herald published a large reproduction of the work.

Both Mr. Proctor and Mr. Walker will exhibit at the coming exhibition of the Canadian Art Club which takes place at the Toronto Art Museum's temporary gallery in the Public Library building soon.

Regular Attendant

As the new minister of the village was on his way to evening service he met a rising young man of the place whom he was anxious to have become a member of his church.

"Good evening, my young friend," he said, solemnly, "do you ever attend a place of worship?"
"Yes, indeed, sir," regularly every Sunday night," replied the young fellow, with a smile. "I'm on my way to see her now."—Metropolitan Magazine.

How To Do It

The tipping system will never become popular while the government of the day cherishes it by paying handsome tribute to its masters. What the government should do is to put tipping on the list of offences for which a heavy penalty can be applied. Then, and only then, will it go—Kingston Whig.

In a Bedchamber (Africa) paper the following advertisement appears: "X.B.—I am preserving all game—from a quail to a koodoo—and as trespassers, whether persons or dogs, will be shot or prosecuted according to law. God save King George!"

The total number of mines worked in the State of New York is forty. There are about twelve iron mines in operation, thirteen of gypsum, eight of talc, two each of salt and pyrite and one of graphite.

Chickens can now be plucked by means of a special electric fan. But the old-fashioned fan is still good enough to pluck the umpire.

AN INVALUABLE MEDICINE

Mrs. W. Arnold, Edmonton, Alta., writes: "Kindly send me a box of Baby's Own Tablets. They have been invaluable to me and I really do not know how I ever would have got along without them. Baby was poorly; his mother was sick and he was constipated. I gave him the Tablets and they made a fine healthy boy of him. I think a lot of other mothers who are troubled with constipation. I always give him the Tablets and they relieve him right away. A trick out of other medicine but nothing seemed to agree with him. I got the Tablets. I would not be without them. The testimonial of Mrs. Arnold is that of thousands of other mothers. Everyone who ever uses Baby's Own Tablets to have well of their babies. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockton, Ont.

Inspector—"Why does a dog hang his head out of his mouth?"
Bright-looking Boy—"To balance his tail, sir."

Through indiscretion in eating green fruit in summer many children become afflicted with cholera, and in the winter with the intestines. Pains and dangerous purging ensue and the delicate tissues of the child suffer under the strain. In such cases the safest and most effective medicine is Dr. Williams' Pink Pills. It will check the inflammation and save the child's life.

Mr. Pugh—"Never saw such a crowd at our church before."
Mrs. Pugh—"New minister?"
Mr. Pugh—"No. It was burnt down last night."

Keep Minard's Liniment in the house

An American archaeologist thinks that the Mayas, who once inhabited America, had a civilization as far advanced as that of any early people known to the Greeks. The dwellers in the jungles of Yucatan, Guatemala and Honduras are believed to be their descendants.

HE'S A CONVERT TO A GROWING BELIEF

THAT DODD'S KIDNEY PILLS ARE THE SURE CURE FOR KIDNEY DISEASE

Mr. Renie Moulaison was treated by two doctors, but found his relief and cure in six boxes of Dodd's Kidney Pills.

Surette Island, Yarmouth, N.S. (Special)—Renie Moulaison, a fisherman of this place, is a convert to the growing belief that Dodd's Kidney Pills are the sure cure for Kidney Disease.

My trouble started with a cold," Mr. Moulaison states. "My muscles would cramp, I had backache and I had dizzy spells. My head often felt as if it were too much for me. Then I started to take Dodd's Kidney Pills and soon started to improve. I took six boxes in all and now I am glad to say I am cured."

If you have any two or three of Mr. Moulaison's symptoms you may be sure your kidneys are not in good working order. Bad kidneys mean Backache, Rheumatism, Heart Disease or Bright's Disease unless attended to. The one sure way to cure them is to use Dodd's Kidney Pills.

An English cruiser, which had been in the water for eleven years, was recently relieved of forty tons of barnacles, mussels and vegetable growth.

TWO AND A HALF HOURS ON OPERATING TABLE

Specialist Could Not Remove Stone in The Bladder

GIN PILLS PASSED IT

Joliette, P. Q. "During August last, I went to Montreal to consult a specialist. He had been suffering terribly with Stone in the Bladder.

He decided to operate but said the stone was too large to remove and too hard to crush. I returned home and was recommended by a friend to try GIN PILLS.

They relieved the pain. I took two boxes and went back to the specialist. He said the stone was smaller but he could not remove it although he tried for two hours and a half. I returned home and continued to take GIN PILLS, and to my great surprise and joy, passed the stone.

GIN PILLS are the best medicine in the world and because they did me so much good, I will recommend them all the rest of my life.

J. Albert Lessard, 50c. a box—6 for \$2.00—at all dealers, and everywhere if they fail to get relief. Sample box free. National Drug and Chemical Co., Dept. N.T., Toronto.

TORONTO, ONT.

W. N. U., No. 848.

Didsbury Will Celebrate

A large and enthusiastic meeting was held last Friday night in the Alexandra sample rooms for the purpose of arranging for a good time in the old town on June 22.

After the meeting was called to order H. E. Osmond stated the object for which the meeting was being held was to find out if it was desirable and if the townspeople thought that we should have a celebration on Coronation day.

It was decided unanimously to go ahead with the idea.

The meeting then chose Mr. H. W. Chambers as chairman, pro tem, and H. E. Osmond, Sec. pro tem.

It was decided by those present that the following programme should be carried out if possible: Lacrosse, Didsbury vs. Calgary; Baseball; Foot races; 2 mile road race; Jumping races; Pany race; Tug-of-war; and a calisthumpian, trades and automobile parade.

The elections of officers for the occasion then took place. Messrs. Chambers and Osmond were requested to

hold down the positions they occupied that evening but both declined as they felt that they were not in a position to do justice to the occasion.

The following officers were then elected: Mr. R. A. McPherson, chairman; Mr. J. V. Berscht, Secretary; Mr. T. W. Cuneannon, Treasurer. Finance committee to be composed of the foregoing officers; Sports committee to confer with finance committee, Messrs. Chambers, Findlay, Hembling, and McCarney.

The committee will interview the Town Council for a grant as it was felt that the burden of the cost should not altogether fall on the merchants.

The meeting then adjourned full of enthusiasm for a good time on the 22nd of June. Don't forget, but come to Didsbury on that date for a good time.

Another meeting of the above committee was held on Monday night to strike other committees who are requested to meet at the Alexandra sample rooms on Tuesday evening at 8 o'clock.

Live Stock and Insurance

G. T. McGill, Agent for British Empire Insurance Co., Ltd., desires to announce that on Thursday, June 8th, he will be glad to meet owners of Live Stock, who may wish to discuss insuring same, at the Alexander Hotel.

Prof. P. P. Adams, teacher of Bible and History in the Alberta Industrial Academy, Lacombe, will deliver a lecture entitled "Satan Bound" at Mr. Wigglesworth's store building, corner of Railway Ave, Hiebert St., on Friday evening, June 2, at 8 p. m. Seats free. You are cordially invited to attend.

BIRTHS

ATKINS—On Saturday, June 27th, 1911, to Mr. and Mrs. H. B. Atkins, twins, both boys.

Some Points on Census Taking

The following list of questions amongst others will be asked by the census takers when they visit you, so you are requested to study them a little so that when these men call upon you the information may be handy and so save your self much trouble as well as the census takers.

Number of live stock in 1911.—Horses, three years and over; Horses under three years; milk cows and other horned cattle, swine, turkeys, geese, ducks, hens and chickens.

Number of live stock sold in 1910.—Horses, milk cows, other horned cattle, swine, sheep, poultry.

Animal products in 1910.—Wool; total

milk produced on farm in pounds; home-made butter; home-made cheese; milk sent to factory or sold; Cream sent to factory or sold; eggs.

By-law for Electric Light

The Council held a short session on Tuesday night last week to decide as to placing the bylaws for electric light, waterworks and sewers before the ratepayers. They decided that they would take a vote on the electric light proposition but that it was better to let the other by-laws stand over.

The electric light by-law will be advertised next week.

Local Baseball and Lacrosse News

The league team travelled to Olds last week to test the sphere chasers of that town. However the testing happened to be done by the Olds team to the tune of 11-4, but that of course is only an incident in the seasons playing and Didsbury is making strenuous efforts to redeem themselves on Friday next when Olds plays a return game in Didsbury. They are hard at work practicing every night and are going to let the public see that they mean business.

The redeeming feature of the game at Olds was the home run made by pitcher Enevoldson.

This is the standing of the league:

	Won	Last
Olds	2	0
Bowden	1	0
Didsbury	0	2
Crossfield	1	1

Don't forget to attend the league game on Friday afternoon with Olds.

Another baseball team has been formed in town and it contains some good material too. Both teams are playing practice games together at the park in the evenings.

The Lacrosse boys are out practicing nearly every night and while the game is new to a majority of the povers they are making great progress under the tuition of old players like Leigh Curtis and Alf Cockley. Arrangements are being made to bring up a team from Calgary for an exhibition game on the 22nd.

Sensible Reasons

SHOWING WHY YOU SHOULD BUY A GOOD FORD CAR

Because they are the lightest, least complicated and the lowest priced first class car on the market. Less up keep expense, and less chances for the want of repairs; for the reason that there are less parts to get out of order. Also the difference between pulling 53 lbs. per. horse power and pulling 70 to 80 lbs. per horse power car weight. Because it has no sliding gear to strap. Because it is easier throttled. Because it has no batteries but runs on a magnet all together. Because it has no wheel to whip your shaft out of line on the rough roads. Because it is the best hill climber made. Because it is the roomiest five passenger car and will give the same service for \$1000.00 that you will have to pay for \$1450.00 to \$5000.00 to get out of other makes.

Because there is no weight on the rear axle to pull the final drive out of line which means a lot to any car. Because they are easier to learn to understand and handle than any other car. The 1911 cars are lightest and possess all of the above claimed features and many others. They will stand the closest inspection and we invite it.

J. C. RINER, Agent,
Didsbury, Alta.

a lot of New Goods for the season, including

Silverware

Call and see them. Prices right.

J. NIXON
Jeweler & Optician

"I can show you the why and wherefore of Semi-ready as the topmost tailoring."

ALONZO H. KIMBALL

Commercial economists have studied the causes of success in modern business. It's a time-worn expression that small profits and big sales, coupled with better quality will always win. It has helped Semi-ready Tailoring to double its customers in two years—exactly double the number.

Plain marked prices—and prices such as few merchants would accept as profitable without demonstration—mark the Semi-ready Tailoring garment—and it's a policy that no other men's wear house has ever attained to. The makers mark the price worth—and guarantee the worth. It's good tailoring and very different from ready-made or retail tailoring.

Semi-ready Tailoring

J. V. BERSCHT, Agent.
